

## USE 777 MIRACLE FINISH

The C.P.R. used 777 Miracle Finishes exclusively in finishing their new Hotel at Lake Louise, and have placed their order for the same finishes for their new Banff Hotel. Why were the 777 Miracle Finishes chosen? The C.P.R. could not afford to have inferior products in these high grade hotels which would necessitate refinishing at short intervals.

After applying their own tests to the 777 Miracle Finishes they selected them exclusively over all others.

The new \$5,000,000.00 Hudson's Bay Company's Building in Winnipeg when completed will be finished throughout in 777 Miracle Finishes.

It is just as important when doing floors or furniture or cases that a high grade finish be used, so that they will withstand the extreme climatic conditions of this district.

On account of buying in quantity we are able to sell you these Finishes at a price similar to what has been charged, in many cases, for inferior products.

NOTICE  
To the Ratepayers of the M.D. of Golden Centre No. 272.

The Attorney General has recently made the following ruling—"Where animals are at large unlawfully, and commit damage, the person who suffers the damage may collect for such damage even though his fence may not be a legal fence."

RALPH GIERNE  
Secretary-Treasurer  
M.D. Golden Centre No. 272  
Dated at Cereal, Alberta, this 8th day of June, 1926.

## Letter to Editor

Editor, Oyen News:  
Dear Sir:

We read from time to time letters in your paper on marketing of wheat, co operation, boosting farmers unions and various other topics which deal with world affairs, but the question of our local freight rate on wheat has never been discussed. I imagine this is too small a topic for your correspondents as they mostly deal with world conditions and world court etc.

However, in looking over a pamphlet issued by Vancouver Harbor Board dealing with freight rates on grain to Fort William and Vancouver I would think we are being overcharged. Perhaps some one who is better informed can explain why rates are so fixed.

The pamphlet shows that the rate between Munson and Alaska to Fort William is 27 cents per 100 pounds, and to Vancouver is 26 cents per 100 pounds. At Drumheller the rate to Vancouver drops to 24 cents per hundred and gradually drops as we get nearer Calgary. The last few stations this side of Calgary get 21 cent per hundred rate to Vancouver and 20 cents to Fort William.

If you figure mileage over C.N.E. lines you will find that Oyen is only about 135 miles further from Vancouver than Calgary is. Why should our rate be 5 cents per 100 lbs. higher? And why is our rate to Fort William 1 cent per 100 lbs. higher than the Calgary-Fort William rate when we have 207 miles shorter haul?

Also referring to C.P.R. line south of us, we find that between Empress and Bassano the rate to Fort William is 25 cents per 100 and to Vancouver 23 cents per 100 dropping as we go west, at Jenner (which is straight south of Youngstown) the rate to Vancouver is 22 cents per 100 and at Bassano, 21 cents per 100.

I think if our local farmer or organizations would give matters of this kind some of the attention they are paying to politics they would obtain better results for themselves and I also think it would be easier to save 1 cent a bushel on local freight rates than it is to force the world market a cent higher.

W. M. Denton.

Fuego Well Down 2520 Feet  
Drillers Work Day and Night

Work at the Fuego Oil Company's well is being carried on day and night, and satisfactory progress is being made.

The News was informed to-day that a depth of 2520 feet had been reached and casing was down 2500 feet. Greatest enthusiasm is shown by all the staff.

Shares in the company are still selling at par.

## Famous Park Where Indians Once Gathered

Upper—The Pavilion. Left—A Birch-bark Wigwam. Centre—Tame Tidy taking his daily dip. Right—S.S. Astoria, one of the magnificent Canadian Pacific passenger steamers plying the Great Lakes from Fort McVie to Port William and Chippewa Park.

Night after night on the shores of Thunder Bay, long ago, were heard weird chanting laments of Indian tribes. Hundreds of members of various tribes then made this inlet in Northern Ontario ring with their shouts and songs, and the resounding sound of wooden sticks thumping with monotonous regularity on buckskin tom-toms. There the Indians went to hunt and that was the site of many a tribal rendezvous.

For three miles the water from looks out over the spreading waves of the Bay at the Sleeping Giant. The welcome islands lie in that entrance while beautiful, picturesque Pie Island is on the southern side. In place of the laboriously hand-made, intricately decorated war

canoes of Indian days may now be seen processions of great Canadian Pacific passenger and freight vessels, and the fleet of smaller craft flying in and out of Fort William and Port Arthur. Where enchanting Indian laments rose high and clear in the humid air may now be heard the voices of happy English-speaking throngs of tourists.

On the sandy beaches of Thunder Bay has magically arisen a park called Chippewa. Camping grounds, attractive lodges, long, shady lanes overshadowed by towering giants of the forest, and a real, honest-to-goodness, live-animal zoo are among the features which have contributed to the popularity of Chippewa Park. The three hundred acres of forest lying under the shadow of Mount

# Capt. J. T. Shaw's MANIFESTO

1. Immediate examination of our provincial taxation system and adjustment on sound principles of taxing powers between the provinces and the municipalities.
2. Decentralization as far as practicable in the services of government, so as to secure more efficient service at less cost.
3. An immediate and long overdue reduction in taxation with special tax adjustments for sub-tropical areas not suitable to intensive production.
4. A serious and determined effort to make expenditure balance income every year, not every pre-election year only, as at present.
5. The budgeting of an adequate sum every year, on the sinking fund principle to effect the retirement of our public debt within a reasonable time.
6. Realizing the primary importance of the agricultural industry, the Liberal party pledges itself to assist that industry in every reasonable way, by ensuring that co-operative marketing enterprises get a square deal, secure from unfair competition, and from all partisan influence and all discrimination; by the provision of adequate facilities for marketing the farmers' produce, by establishing, in close co-operation with the Dominion government, a system of rural credits based on some sound principle; by vigorous demands before the Railway Commission for needed reductions in railway and express rates; and for the elimination of discriminatory freight rates, and by jealously guarding the farmers interests in the western north, not only by zealous watching but also by proper representation.
7. The Liberal party undertakes to inspire a real leadership in educational affairs and will be prepared to make more liberal financial provision for that essential service. Also will use every endeavor to have the federal government not only continue but increase its grants for technical education. In addition there must be a closer co-ordination of the agricultural work undertaken by the university and agriculture and other schools in the province.
8. The Liberal party pledges itself to encourage an expansion in the hospital and nursing service of the province in order to promote the highest standard of public health.
9. The Liberal party has assisted in every possible way to secure the return to the province of its natural resources. This should soon be realized. If honored with public confidence the Liberal party proposes to undertake the prompt and efficient development of these resources in the public interest along sound business lines.
10. When entrusted with office the Liberal party will engage a small body of experts to examine the sources of power in the province for the purpose of evolving if possible a practical power scheme to supply cheap power to our communities for industrial and agricultural purposes.
11. The Liberal party offers a redistribution according to a definite plan on the principle of representation by population, paying however, due regard to the more sparsely settled portions, geographical area, and community of interest; it being understood that such redistribution will substantially reduce the number of provincial ridings.
12. The Liberal party proposes to encourage a policy of co-operative effort of all classes of public representatives in the interests of democratic legislation.
13. The Liberal party strongly favors and approves of a co-operative effort between the Dominion and Provincial governments for the purpose of securing old age pensions. The plan which has received second reading in the House of Commons is approved.
14. The Liberal party is responsible for every advance made in securing to women a larger measure of equality in political and economic matters. That policy must be continued until in every practical way, women enjoy the fullest equality with men.
15. The Liberal party offers to the electors a policy of constructive effort and of action, and a government "of all the people, by all the people and for all the people."

## French River Fishermen's Paradise

Upper—The Rapids. Camp at French River. Lower—The fish of the hour! At French River. Lower fish—law for brackish.

By Ozark Ripley

There is a fascination to fishing new waters hardly equalled by the number of fish which are taken. Because every stream and lake has its peculiarities. A certain amount of study of local conditions is necessary. Successful fly and bait casting is study, especially when applied to bass and trout fishing. The man who devotes most time to studying a new lake or stream comes back home not only with fish but a perpetual mental picture of the resort he visited in the summer.

If everywhere the bait or fly caster went he took fish just as he pleased then the real spice of the visit to the waters would be lost. Nobody appreciates any more of sportfishing in solving new puzzles, new waters and deriving most pleasure from the unexpected. Streams and lakes are living things and depend themselves accordingly. They may be full of all kinds of game fish and yet yield up nothing until we know to local conditions and agree that they need another study.

The first mystery I ever took on a fly rod was near Pine Camp rapids on French River in Ontario, the people would be could not be done. There were long trails before I succeeded and yet a little study brought some facts to my knowledge. Late in the evening for dropping over the little, swift fall and peering on the wall-eyed fish which were so abundant below. The very first white feather-minnow I cast after becoming possessed of this huge connected one with a line one that gave me a dizzy and bone-jarring

up and down the rapid before victory came to my credit.

In the lower Niagara last summer where life rivers feeds its course in Niagara Bay I was singularly fascinated by the clear, swift water and the poor results I had with ordinary trout and salmon flies, then every once in a while I could see one of the immense red-spotted fish rise along the east bluffs below the Canadian Pacific bridge. I knew for quite a while that those big trout were by nature minnow feeders; their special favorite was a little local catch called "brim" among the rocks, the cockleheads. But what pleasure would there be in taking one of these kindly brook trout with bait? Study of the river gave me an idea. Then for a lure I attached a quarter ounce minnow, even akin to a feather minnow made of Plymouth Rock rooster feathers. That is how I took my first five and one-half pound brook trout last summer in the Niagara.

There are bass lakes and bass lakes, bass streams and bass streams. This applies to the far South as well as the far North. Studying them carefully is what you had to observe and study, and right off my solution came to me that the bait or fly fishermen wants to fish in every place where the water is bass feeding in these parts before he dreams his artificial offerings. As far north as Montreal in Quebec to the big mouth waters in Louisiana the same thing prevails. Right away is elucidated the necessity for studying nature, the habits of the denizens and everything therewith which will make of each the sport.

CAPT. J. T. SHAW  
and  
GEORGE CAMPBELL  
speak in  
OYEN THEATRE  
SATURDAY NIGHT

### Here and There

On May 10 two hundred new Scottish settlers arrived on the Canadian Pacific liner "Metagama" in charge of Father R. A. Macdonnell, managing director of the Scottish Immigration Aid Society. This is the second consignment of settlers brought out this year under the Canadian plan.

The well-known comic strip artist, Clare Briggs, of "Mr. and Mrs. Frazz" arrived in Montreal recently with six New York newspaper men. They then went up to the Laurentian mountains for some trout fishing on Lake Arambouille and returned in the immediate vicinity of St. Donat, Chatelet.

A. L. Rawlinson, passenger agent, and Victor Collinson, chief clerk of the Canadian Pacific Railway at Antwerp, have been appointed Officers of the Order of the Romanian Crown by His Majesty, King of Rumania, for services rendered in connection with the general handling of Rumanian passengers at the port of Antwerp.

An innovation is now in use along the Laurentian run of the Canadian Pacific Railway in the form of two hospital cars which will meet any demand which arises or urgent calls that may occur in cases of illness. First-class cars have been converted into hospital rooms in such a way as to easily take care of four or five sick persons.

The pedigree certificate of the Percheron Stallion 'Ben of Excel' No. 11199 described as follows: Color, grey; Marks, blaze, black; white on off hind legs, high hind foot white. Foal 4 May 12, 1922. Owned by H. G. Peck of Oyen, Alberta, and is hereby certified that the said stallion is recorded in the Canadian Live Stock Records or is registered in a stud book recognized by the Canadian National Live Stock Records Board or has been approved by the Minister as a pure breed stallion, as the case may be; and is allowed to stand for public service in the Province of Alberta; and is granted this certificate. Issued at Edmonton 14th day of January, 1923. Signed George Hoadley, Minister of Agriculture." For further particulars, phone 1210. H. G. Peck, Oyen, Alberta.

## Eucharistic Congress

Chicago, June, 1926

The Greatest Event in the History of the Catholic Church in America

C.N. Ry. To Operate Special Trains From Western Canada

Of unusual importance to Roman Catholics is the 28th International Eucharistic Congress in Chicago, Ill., June 20th to 24th next.

The Church dignitaries are duly appreciative of the efforts made by the Canadian National Railways, who have arranged to operate special trains to and from the Congress, and have also made reservations for several hundred people in good hotels at a reasonable expense, and ask their people to make application promptly for the necessary sleeping car and hotel accommodations. The Church authorities were consulted prior to arranging the train service so that the proper departure time from the various centres would be ensured.

Those who desire to use the regular service have the privilege of travelling on the through train which is operated during the summer season from Western Canada to Chicago.

Any agent of the Canadian National Railways will be pleased to give you further particulars and complete all arrangements.

W. N. U. 1632 ing. He only smiles."

Not even a general strike involving some four million workers interfered with Canadian Pacific Railway transportation in England. The company held huge char-a-bancs in readiness to convey passengers from inland cities to seaports where the vessels they wished to board were leaving. Above are shown passengers for the Canadian.

Bad news and soft-bolled eggs  
should be broken gently.

Brazil occupies an area equal to that of Europe.

[illegible]

Men resemble whales. They  
sooner get to the top than they be-  
lieve to blow.

even a general strike involving the four million workers interlocked in Canadian Pacific Railway transportation in England. The company's huge car-buses in readiness to ferry passengers from inland cities airports where the vessels they operate will arrive or depart are shown passively for the Canada Pacific line Montreal leaving the company's offices, Trafalgar Square, London, for Liverpool, on Thursday, May 6. The motor cars run on regular time schedules, saving the travellers ample time to make their travel arrangements. All such travellers are assured of safety through England well worth while.

At his best in May, old England sends beautiful rolling down-shedding roads and charming views, making it a pleasure to drive. It is a pity that there are more train runs today to carry out all obligations to patrons, the Dominion Express Co. busy had a complete fleet of motor cars to take them to their destinations during the summer months.

### Modern Highway Across Canada

All-Canadian Road From Halifax To Vancouver Before End of Year

Four different governments have at last heeded the call for an all-Canadian highway stretching from Halifax, N.S., to Vancouver, B.C. Four governments have met on equal ground, and each has pledged the completion of the necessary work. Ontario says: "We are already completing our last remaining link." Alberta is to have its link ready this year. The Dominion Government, speaking for Jasper National Park, states that it will link up with Alberta this year, and British Columbia, the last to fall into line declares, "When the Jasper highway reaches Tease-James Cache, British Columbia will have a road ready to carry it on to Vancouver." It will be possible to tour across Canada on a modern highway before the end of the present year.

### Stone Age Weapons Efficient

Recently Discovered in England Have Edge Keen As Razor

An aerial was discovered some 15 years ago. Two local men discovered about sixteen months ago, and since then about four thousand hammer stones, flint axes and scrapers, and other worked flints, have been taken out of the dump. The tools and weapons, although they belong to the earliest period of the Stone Age, are wonderfully efficient. Some of the edges are still almost as keen as razors.

"About 1,200,000 tons of Alberta coal will be used by the Canadian National Railways in Western Canada this year," according to R. C. Vaughan, vice-president of the Canadian National.

Government terminal elevators in Canada earned a total of \$760,440 in the last crop year and spent \$240,466. In operating expenses, it was stated in the House of Commons in answer to a question.

### A Health Item of Interest

A New and Effective Method of Promoting Health

It will be good news to our readers that they now have available a most effective, simple, and practical method in the home by eliminating the diseases that are transmitted by flies and mosquitoes. The remarkable insecticide which has been perfected by the Standard Oil Company of N.J. is now obtainable in Canada at almost any drug store, hardware store or grocery store.

For years the research laboratories of the Standard Oil Company of N.J. were engaged in developing a type of insecticide that would be clean, safe and easy to use.

At last their expert entomologists and chemists succeeded in perfecting a thoroughly scientific product superior to the old methods of killing insects, in that it kills only the insects that come anywhere in the neighborhood of the application of the spray, and that is very quick and sure in its action.

Having found this wonderful answer to the insecticide problem, they called it "FILL," and under this name it has attained a huge sale in the United States, and is in fact widely recognized as an aid to home health, by reason of these qualities which make it sure death, not only to flies and mosquitoes, but also to moths, ants, bed bugs and roaches. This wonderful product is now on sale in all parts of Canada.

Sprayed into cracks and crevices, where insects hide and breed, FILL destroys both the insects and their eggs. An added advantage is that FILL will not stain the most delicate fabrics. This has been proved by extensive tests.

### Wins High Art Award

Armless Japanese Girl Carried Off Honors in School Exhibition

A Japanese girl, handicapped by the loss of both arms, but possessed of great courage, astonished Tokyo art circles by carrying off the honors of the Peersagee school exhibition. Holding specially constructed brushes between her teeth, Miss Yonoko Yamaguchi, the armless artist, has for several years painted oil, the decorative work, but also to moths, ants, bed bugs and roaches. This wonderful product is now on sale in all parts of Canada.

Always Ready and Reliable. Practically all pains arising from inflammation can be relieved with Dr. Thomas' Electric Oil. Simply rub it on the sore spot and it is quickly absorbed by the skin. Its healing power is conveyed to the inflamed tissue which is quickly soothed. This fine old remedy is also a specific for all manner of cuts, scratches, bruises and sprains. Keep a bottle handy always.

### Plans Aerial Expedition

Engineer Antonio Pauly, of Buenos Aires, has presented to the ministry of the navy plans for an Argentine aerial expedition to the South Pole and an extensive scientific exploration of the Antarctic continent.

A coward is a man who knows he is wrong and refuses to admit it.

All men are equal before the law, but not before the mother-in-law.

### ON THE AIR

What is Doing in the World of Radio

There has been quite a boom in wireless sets in Paris since the general strike in England, especially among English-speaking residents who used them to get their strike news.

Many persons are suffering from radio deafness because they listen for many hours without removing the ear phones, as an specialist advises the use of loud speakers.

Con.—The radio will never take the place of newspapers.

Deques.—Who?

Cob.—You can't start a fire or line a carpet with a radio set.

Many broadcasting stations are now making public their advertising rates. One United States broadcast station has a rate ranging from \$50 for a quarter of an hour during the day to \$120 for one hour at night.

Tallegies, the famous priest and scientific electrical engineer, who is noted in France for his inventions as well as his sermons, has just completed what he claims is the first really perfected loud speaker for crystal sets.

Air conditions for radio are best in February, the best months being March, January and November. Commercial wireless service inaugurated at Rio Janeiro, Brazil, is in touch with London, New York, Paris, Berlin and Rome.

Sonia Radina, radio artiste, has insured musical manuscripts for \$100,000. She spent four years living with the peasants of Europe, listening to their folk songs and copying them by candle light. She uses these manuscripts for her radio concerts.

Electric power men from all parts of Wisconsin have pledged themselves not only to eliminate power interference of radio reception, but to assist the radio set owners in finding the source of much of the other outside troubles such as violet ray machines, X-rays and such.

When a radio receiving license is granted to a listener in Japan, his set is turned to the wave length of the Tokyo Municipal Broadcast station and then sealed so that no other station may be tuned in. It is reported that this is done in order that no radical ideas can be picked up if put on the air by secret broadcast stations.

Many people have the mistaken notion that the resistance of headphones is a measure of their quality. Actually, radio headphones of 2,500 ohms resistance may be much better than others of 5,000 ohms resistance. The resistance is determined by the length, size and kind of wire used in their construction. Their performance is a matter of proper engineering design and the use of good materials.

The Oil for the Athlete in rubbing down, the athlete will find Dr. Thomas' Electric Oil an excellent article. It renders the muscles and stores pliable, takes the soreness out of them and strengthens them for strains that may be put upon them. It stands pre-eminent for this purpose, and athletes who for years have been using it can testify to its value as a lubricant.

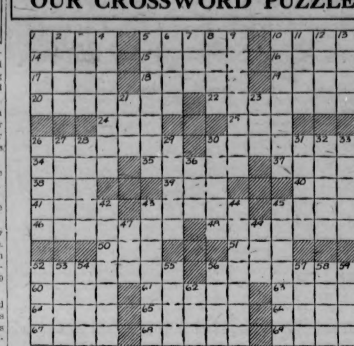

### World's Poultry Congress

The Belgian minister of agriculture has named official representatives to the World's Poultry Congress at Ottawa, July 27 to August 4, 1927. There are M. Maenhout, member of the House of Representatives, and president of the National Federation of Poultry Societies of Belgium, Lemberg; M. Polinckx-Eman Y., editor in chief of the Journal Chasse et Pêche; and M. Heyndrickx, Ach., a Chasseuse de Bruxelles, Ledeberg.

### To Develop More Power

Two million dollars will be expended by the Winnipeg Electric Company and its subsidiaries in making the necessary provision to obtain and utilize power from the hydro-electric plant at Great Falls during the next eight months. It is announced. A considerable proportion of this expenditure will be represented by large power machinery, it is stated.

### SUNDAY SCHOOL LESSON

JUNE 13

#### JOSEPH'S FIDELITY

Golden Text: Seest thou a man diligent in his business? he shall stand before kings. Proverbs 22:29.

Lesson: Genesis 39:1-23.

Devotional Reading: Proverbs 4:10-13.

#### Explanations and Comments

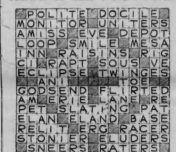

Joseph becomes House-Servant in Egypt, verses 1-6.—A band of Ishmaelites brought Joseph down from Egypt. (See The Historical Background) and there sold him to Potiphar, Pharaoh's captain of guard. Owing to his personal charm (for he was comely and well-favored, verse 6), Joseph was taken into his master's house as a servant instead of being sent into the fields to labor. What a contrast from his life at home as the favorite son of his father Jacob to free life in the open as a shepherd must have been his life in that Egyptian household! But Joseph was adaptable. In a short time his ability and trustworthiness—a token of God's presence—won him—led Potiphar to make him the superintendent of his household, or house-steward. Potiphar's confidence in Joseph was so complete that he put everything into Joseph's hands, save his own food. The accusation was probably due to the strict laws of caste in Egypt: see Gen. 43:34, 35.

"Character plus capacity plus charm always makes his way." "The Lord made all that he did to prosper. There is no hint of miracle here. Providence works from within. In outward, as well as from within, God honors trustfulness. If you are sure that you are in the hands of the God above, and under his guidance, you have a quicker eye for a stealer hand for the affairs of this life. Prosperity inevitably follows" (R. C. Gillet).

#### Prisoners Returned After Holiday

A check-up shows that all the prisoners of the jail at Tucuman, Argentina, had freedom for a day on the occasion of the anniversary of Argentina's independence day, returned to the jail.

### Answer to Last Week's Puzzle

### Piracy Is Still Practiced

But Is Most Common in Oriental Waters

That pirates still exist is evident by the action taken in Switzerland at one of the League of Nations meetings. It provided for an agreement that warships of a nation may chase pirates into the territorial waters of any other nation. The pirates then will be tried in the country in which they are captured. This action came about in codifying international law and the suggestion on piracy came from a Japanese minister. "It is apparent piracy is more common in Oriental waters."

Woman's love for ribbons may be accredited to her having originated from a rib.

### Flesh Wounds.

Apply Minard's freely. It removes all the poison and allows the wound to heal quickly.

## Just how many people do save?

A man may read of the large deposits placed in banks and come to the conclusion that everyone is saving money—perhaps except himself.

The fact is that a great many people save nothing whatever, and that the proud per capita showing of savings in Canada is built up by the thrifty.

It is the savers, however, not the non-savers, who control their own welfare and take advantage of their opportunities. It is the savers who succeed.

The Bank of Toronto not only welcomes depositors but extends a friendly personal service which aims to promote in every way the welfare of its clients.

Having decided to discontinue the well drilling, pump and windmill business, the following articles must be sold within two weeks, regardless of price!

One Spartan drilling outfit, 1000 feet capacity, complete, in running order.  
One Dodge touring car in A. I. condition.  
Pumps, Windmills, Cylinders, Pipes, Reds, (steel and wood).  
One Cockshutt wagon, also  
Four fresh milk cows (heavy milkers), Four Yearlings and one sucking calf.

Now Mr. Farmer, if you are looking for bargains at Busy!

Notary Public

Miss Anna Mitchell, who recently returned from Normal School, has received the appointment as teacher at Tipperary School. Miss Mitchell left last Saturday to commence her duties and was accompanied by Rosie England who will spend the next few weeks with her.

Mr. C. Riel was allowed to leave hospital last Sunday.

Mr. S. A. Miller left yesterday for Banff, Alta., where he will represent Oyen Lodge No. 104, A.F. and A.M., at the annual session of Grand Lodge.

Miss Gertrude Cleugh and Miss Ruth Reid, returned to Oyen last Saturday, after attending Normal School.

Miss Gilchrist of Winnipeg, is the guest of Mr. and Mrs. T. Thompson.

The worst wind this district has experienced this year occurred yesterday. Blowing from the east throughout the day, the wind almost attained hurricane velocity in the late afternoon. After quieting down in the evening it veered round to the west. To-day the weather is calm and sunny.

Walter Johnston and A. J. Funnell, who motored to Lloydminster last Saturday and afterwards visited the Wainwright oil field, returned to Oyen last night.

"Ben" Herr motored to Hanna yesterday on a business trip. He is expected back to-morrow.

Mr. and Mrs. Thomas Thompson and Miss Gilchrist, motored to the Red Deer river this afternoon.

Mrs. A. A. Baker has been named to act as returning officer in the Medicine Hat riding in the forthcoming provincial election, and claims the distinction of being the first woman to hold the office in a general election.

### CARD OF THANKS

The relatives and friends of the late Mrs. Dan Osseoff, desire to express their thanks to Rev. C. E. Corcoran, Mr. D. E. May, the United Church Sunday School, and all friends for the sympathy and kindness shown in their recent sad bereavement.

### READ THE ADVERTISEMENTS

Friday, ..	25 Springborn	Oyen
Saturday, ..	26 Bonnie Brier	Sibbald

Afternoon meetings at 2:30 Evening meetings at 8

EVERYONE CORDIALLY INVITED

RAY, C. ANDERSON, Secretary,  
Acadia U.F.A. Provincial Constituency Association.

## WIPE OUT THE PARTY SYSTEM

In 1921 J. T. Shaw, present leader of the Provincial Liberal Party, stated that "in the wake of the party system had followed corruption." Mr. Shaw has changed since 1921, but the party has not. We cannot forget what happened in Northern Alberta so recently as last October, in the Dominion General Election.

Alberta in the past five years has had a Government in power, which is acknowledged, even by its opponents, to have been honest and sincere. It has been accused of inaction and extravagance, but these assertions are disproved by evidence of the improved financial administrative conditions in provincial affairs.

The party system is breaking down all over the world. The genius of Albertans has evolved a system immeasurably better, a system which has functioned satisfactorily during the past five years. It substitutes co-operation for opposition in the administration of Provincial affairs. Do not be tempted by specious argument to go back to the evils of 1921.
